

American Angus Association

Below are the directions to export your animal records from AAA and Import them in to 701x.

Step 1: Log in to your Angus online account

[AAA Login \(angusonline.org\)](http://angusonline.org)

Step 2: Download a custom herd file by clicking Reports -> Interactive -> Create Custom Animal Report.

- Only adjust the settings as highlighted to the right as selecting other filters may cause the import to fail.
- Click boxes for Excel Spreadsheet, Select All Columns, Show Interim Indicators, Show Accuracies, and Show EPD/Value Percentile Ranks.

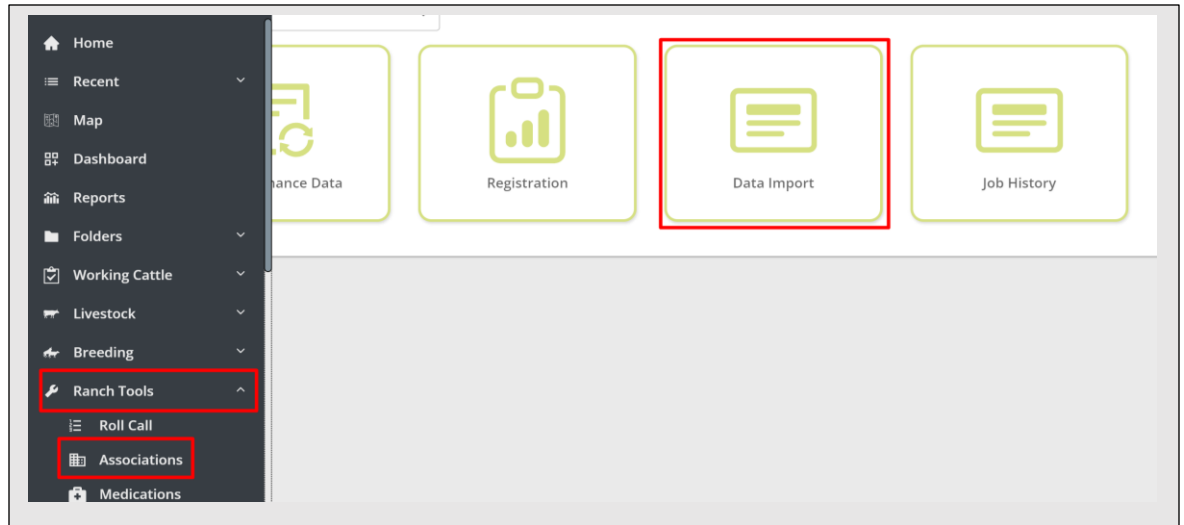

Step 3: Scroll to the bottom of the screen and click "Search". This will download an excel spreadsheet. Please remember the name and location within your folders that you save this excel sheet.

The screenshot shows the AAA website interface. At the top, there's a navigation bar with 'REPORTS' highlighted. A dropdown menu shows 'Interactive' and 'Create Custom Animal Report'. The 'CUSTOM ANIMAL REPORT' form has several sections:

- ANIMALS TO DISPLAY:** Includes filters for Birth Date Range, Sex, Include Owners, Animal Set, and Pasture.
- Display Selections:** Includes a checkbox for 'Excel Spreadsheet' (highlighted in red).
- Data to display:** Includes a checkbox for 'Select All Columns' (highlighted in red) and other options like 'Show Interim Indicators', 'Show Accuracies', and 'Show EPD/\$Value Percentile Ranks' (all highlighted in red).
- Checkboxes for data types:** Includes 'Animal Information', 'Birth', 'Maternal', 'Ultrasound', 'Epds', and 'Genomic Rank' with various sub-options.

Step 4: Log in to the 701x web app at mobile.701x.com.

Step 5: Open navigation bar on left side of screen and click “Ranch Tools” -> “Associations” -> “Data Import.”

Step 6: Choose the ranch you want animals added to as well as the association these animals are registered with.

Step 7: Choose the file you want to upload.
**this is the file from steps 1-3.

Step 8: Select how you would like animals imported and then click “yes”.

- Option 1: “Create and Update Reg. Animals” this will allow import to update data on any animals it is able to match up through unique identified such as Registration number. For the animals that don’t have a viable match in 701x, it will create them as a new animal in the system.
- Option 2: “Only Update Reg. Animals” This will only update data on animal it is able to match through unique identifiers. The rest of the animals on spreadsheet will NOT be added to 701x.

Congratulations - your Import is now started. You will receive an email once import is complete.
