

American Chianina Association (ACA)

American Chianina Association (ACA) Interface with 701x Autonomous Rancher®

As a registered 701x plan customer and member of the American Chianina Association, you can save yourself time and effort by importing your breed association records directly into our software.

How do I obtain the Herd Inventory File from my Breed Association to import into 701x Autonomous Rancher®?

The Herd Inventory file or Herd Extract is a copy of your active registered cattle records, 3 generation pedigrees, current EPDs (Expected Progeny Differences), and current performance information that has been previously submitted to the association.

The American Chianina Association allows for members to directly download their herd data files from their accounts on the association's website.

1. Log into your ACA account
2. Locate the tab list on the left side of your screen
3. Scroll down until you find the tools tab and select it
4. In the drop-down tab select Integration and hit download
5. Choose to download and save the file to your computer or desktop

If you need any further help with downloading the file, please email stephanie@chicattle.org attention Stephanie Snook or call the association at (816)431-2808.

Important Items to Note:

- **DIGITAL BEEF ONLY EXPORTS YOUR ACTIVE ANIMALS. PRIOR TO IMPORTING FILES INTO OUR SOFTWARE, MAKE SURE ALL ANIMALS THAT ARE DECEASED OR SOLD ARE CHECKED OFF AS SO AND NO LONGER INCLUDED AS AN ACTIVE ANIMAL. ALL ANIMALS IMPORTED WILL BE LISTED AS LIVE ANIMALS AND YOUR SUBSCRIPTION WILL BE CHARGED ACCORDINGLY**
- Imports will take a couple of minutes depending on the size of the file. It takes around one second per animal to download, so for example uploading 180 animals should take about three minutes. For this reason, a strong Wi-Fi connection is suggested to speed up the process.
- While the files are transferring you can continue using the Autonomous Rancher app and its features and you will receive an email notification when the file has successfully been imported or if it has failed
- If the transfer file fails, please copy the code given within the email and send it to info@701x.com and state "file transfer failure" so we can fix the problem for you
- You must resync the app by either refreshing the app or clicking the arrows circling symbol in the taskbar for animals to show up in your herd inventory
- If your file contains more than 1,500 animals, it may time out, so please plan to contact us prior if doing so at info@701x.com or 844-444-7019
